Computer Layout and Design

- SolidWorks
- Merry Mechanization Fabricating Layout and Design Software

Laser Cutting

- Amada 2,000W CNC Laser

Punching

- 22 Ton Murata CNC Turret Punch Press with (2) Auto-Index stations

Forming

- 40 Ton Toyokoki Servo Electric Press Brake

Hardware Insertion

- Haeger Hardware Insertion Presses

Welding

- AC-DC TIG Welding
- Resistance Welding
- MIG Welding

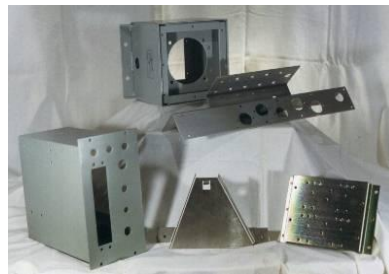

Deburring/Grinding

Machining/Sawing

Painting/Finishing

About our Company

The Brittany Company has over 45 years of success in precision sheet metal fabrication. We utilize CAD layout, CNC laser cutting, CNC sheet metal punching, metal forming, TIG welding, spot welding, hardware insertion, painting and finishing to produce quality sheet metal parts.

Electronic enclosures, assemblies, panels and brackets are just a few samples of our capabilities. The Brittany Company has the ability to quickly and efficiently take designs from concept to a finalized product. We take pride in providing superior customer service, ultimately working to establish a relationship built on trust and confidence.

The Brittany Company consistently collaborates with engineers and purchasing departments to optimize designs and make them as cost effective as possible. Save your company money by letting our experience work for you.
